

Joanna Żuczkowska

Product / UX Designer

zuczkowskaj@gmail.com · joanna-zuczkowska.netlify.app · linkedin.com/in/joannazuczkowska · Wrocław, Poland · open to remote

PROFILE

Product and UX designer with 3 years of freelance experience across branding, UI/UX and e-commerce. I work end-to-end: research and information architecture, wireframes and design systems in Figma, then building the actual front end myself (HTML/CSS, React, Supabase, Vercel) with AI-assisted development tooling. Looking for a Product/UX Designer role on a team that ships products, not just mockups.

EXPERIENCE

Design & Systems — 2026 — present

Kamino BioLabs (SpaceBoost pre-acceleration programme), Wrocław / remote

- Own the complete climate control system as a Demo Day deliverable — from hardware to interface.
- Selected and integrated sensors (air temperature, humidity, light levels, nutrient solution temperature) on Raspberry Pi 5.
- Built the control logic in Python and designed and implemented the dashboard for real-time monitoring.

Freelance Graphic & Product Designer — Jun 2022 — present

self-employed, Wrocław / remote

- Designed and shipped websites and e-commerce stores — UI, design system, front end, payment and courier integrations.
- Full visual identities for B2B clients (incl. a law firm: logo plus stationery and document system, still in use).
- Editorial work: book and e-book covers, publication layouts, marketing collateral.
- Own digital products (Notion and Excel templates) — design, sales setup and short-form content marketing.

SELECTED PROJECTS

Nature&Future — nfplantbiotech.com

Storytelling and e-commerce platform for in vitro plant propagation. Multi-page build: narrative homepage, shop, customer area and admin dashboard. Design and implementation.

SUOH — dark-luxury e-commerce

Premium handmade brand — identity, UI and store built in HTML/CSS with Stripe, InPost, DPD and DHL integrations. Deployed on Vercel.

log.txt — web / mobile app

Journaling app with a developer-environment aesthetic: monospace typography, terminal-style microcopy and consistent light and dark themes.

EDUCATION

MSc in Management (in progress)

Wrocław University of Science and Technology · from 2026

Bachelor's degree

WSB Merito University Wrocław · 2024

Engineering Physics — first year

first exposure to programming (Python)
